### **COVID-19 AND DELAYED EXAMINATIONS**

The pandemic Covid-19 has spread over whole world and compelled the human society to maintain social distancing. It has significantly disrupted the education sector, which is a critical determinant of a country's economic future.

According to the UNESCO report, it had affected more than 90% of total world's student population during mid April 2020 which is now reduced tonearly 67% during June 2020. Outbreak of COVI-19 has impacted more than 120 crores of students and youths across the planet. In India, more than 32 crores of students have been affected by the various restrictions and the nationwide lockdown for COVI-19. As per the UNESCO report, about 14 crores of primary and 13 crores of secondary students are affected which are two mostly affected levels in India.

After observing the corona virus pandemic situation the WHO advised to maintain social distancing as the first prevention step. Therefore, every country started the action of lockdown to separate the contaminated people. The education sectors including schools, colleges and universities became closed. Classes suspended and all examinations of schools, colleges and universities including entrance tests were postponed indefinitely. Thus, the lockdown destroyed the schedules of every student. However, it is an exceptional situation in the history of education, COVID-19 has created many opportunities to come out of the rigorous classrooms teaching model to a new era of digital model.

The lockdown has compelled many educational institutions to cancel their classes, examinations, internships etc. and to choose the online modes. Initially, the educators and the students were quite confused and didn't understand how to cope up with the situation of this sudden crisis that compelled closure of the educational activities. But latter on all realized that the lockdown has taught so many lessons to manage with the emergence of such pandemics. COVID – 19 has created many challenges and opportunities for the educational institutes to strengthen their technological knowledge and infrastructure. The lockdown has given them a ray of hope for teachers and students to continue their educational activities through online. The teachers assigned work to students via internet, delivered lectures video conferencing using different Apps like Zoom, Google meet, Facebook, YouTube, and Skype etc.

In all this situation Universities has big challenge to conduct examination and display result to avoid curricular loss of students and tackle situation with safety precautions. Thus by delaying examination MUHS university decide to collect marks of internal assessment online only. Student answered questions of provided question paper in provided guideline by MUHS.
