8.1.9 Efforts of the Institution towards conservation and validation of local health traditions during the last five years

Response:

Regarding conservation and validation of local health traditions, our institute had planned visits to local healers, traditional healer and local medicinal herb guides of Nashik district and Gujarat state. Community based approaches for conservation of natural local health traditions to recognize the role of local medicinal knowledge with other knowledge system. Institution is planning workshops for local healers in upcoming years. This will help to develop linkage between local traditional knowledge and Ayurved. And also nullify the knowledge gaps. Along with that, institute is planning for the documentation of such traditional health healers and their treatment patters.
